In my paintings I am working in the borderlands where light and illuminated surfaces meet. The motifs are between half figurative and abstract. They form a starting point in my adventure where I try to visualize a primary component of images that is in fact invisible – the light. In some paintings, the structures blurs slightly and dissolves in the light, in others, illuminated areas stand out even sharper. Sometimes the light itself creates prismatic forms.

Lutz Baar was born in 1946 in Berlin and is living in Partille, Sweden since 1970. Education: Schule für Freie und Angewandte Kunst, Berlin.

He has worked as an art director at different advertising agencies in Gothenburg (Göteborg), Sweden and is nowadays a fulltime artist.
